Healthy Moms Raise Healthy Families

Mothers and children are the foundation of every family. For children to grow and remain healthy, mothers must also maintain good health.

The GNBCHC was founded in 1981 by women who were unable to find the healthcare services they needed. Today, the Greater New Bedford Community Health Center serves over 23,000 low and moderate income individuals in the city of New Bedford, as well as 5,000 families that participate in our on-site WIC program.

3000 women utilize additional services at the GNBCHC. Of these, a large percentage are at-risk pregnant women. Additionally, our outreach programs service 600 mothers and 100 teens in New Bedford, and **approximately 50% of New Bedford's mothers find support at the Health Center.**

The need for women's healthcare services in greater New Bedford is high -- and the demand continues to grow. In order to meet these pressing needs, we must add additional exam rooms, a treatment room, as well as office space for private consultation and counseling. **To do this, we need your help.**

We Need Your Help
